

Functions in  
Maths vs

JS

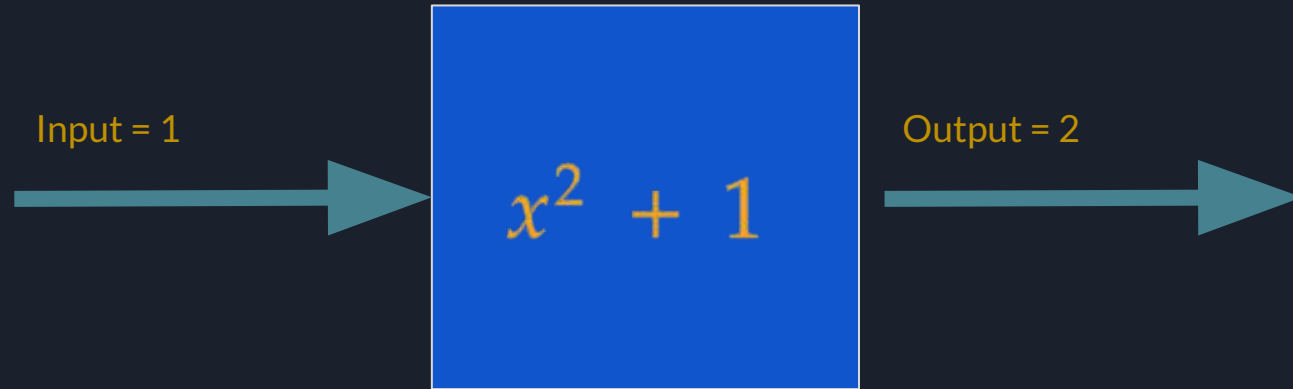

A function in maths and JS takes an input and gives output

# A deeper look into math functions

Let's say we have a function,  $f(x) = x^2 + 1$

Let's say we give in input 2

## A look into **JS** Functions

Let's say we have a function,  $f(x) = x^2 + 1$

Let's say we give in input 2
